PROFESSIONAL EXPERIENCE

Backend Developer (intern) – Wepwn (Startup), Morocco Casablanca

Jan 2025 – June 2025

- Worked as a backend developer in a startup environment
- Built and maintained scalable APIs using NestJS and TypeScript
- Helped improve API performance and maintain clean codebases.

Vulnerability found:

- A Business Logic Flaw leads to permanent email address blocking
- An account take over (ATO) on a known company because of unsecure handling of session cookie

PROJECT HIGHLIGHTS

- **task master (go lang):** A lightweight process manager written in Go, inspired by supervisord, help you to manage and automate your tasks inside your server (github repo [here](#))
- **ft_transcendence (python, Django):** Developed a social platform around a ping pong game using Django The platform featured real-time chat, user profiles, authentication, and the Pong game itself.
- **Cloud-1 (Ansible, Bash):** A project where I automated the deployment of a project using using Ansible (github repo [here](#))
- **ft_shield (C):** A project where i developed a trojan using c if the victim run that executable it will gives me the full access to the machine as a root user (repo [here](#))

EDUCATION

1337 (UM6P) - COMPUTER SCIENCE

OCT 2022 – Present

1337 School uses a peer-to-peer, project-based approach. During my studies, I developed problem-solving skills and collaborated on software projects, gaining experience in algorithms, data structures, and full-stack development.

SKILLS:

Technical Skills :

- **Programming Languages :** C, C++, python,golang
- **Frameworks:** NestJS, Django
- **Development Tools :** Git, Github, docker
- **Testing:** Unit and Integration Testing (GoLang)

- **AdditionalSkills:** Algorithms, DataStructures, System Programming.
